Subject: Change in Allotments for Region 5 700 MHz

Hi All - We are proposing to make a few additions and changes to the channel allotments in the Region 5 plan. There are new allotments to the Port of Los Angeles and a move of an Allotment for the City of San Diego to resolve a interference issue from a new Riverside County site in the SW corner of Riverside County . The allotments will be licensed for an area of operations well over 100 miles from any of the Region 5 borders but I need concurrence from the adjacent Regions for FCC approval.

Please let me know of any concerns or Reply to this email with your concurrence.

Attached is the new proposed list for Region 5. Changes are highlighted in yellow.
